REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The relevant disclosure of Tanaka et al. US 6,629,777 is shown below:

The New claims, which have been drafted by the Examiner, define over Tanaka et al. US 6,629,777 for the following reasons:

The seals that define the bladder are 115A-D. Coupling points 116A-D are disposed within the bladder and are spaced from the plurality of seals defining the bladder. Coupling points 116E are crossed by seals 115A or 115B and therefore are NOT spaced from the plurality of seals defining the bladder. Coupling points 116A-D, the coupling points that ARE spaced from the seals as claimed, do NOT couple the upper and lower films of the film check valve to the upper sheet 117 as is claimed. The coupling points 116A-D only couple the upper and lower films of the film check valve to each other. The film check valve is described as "floating", and from col. 12, lines 1-6, it is clear that the connection of the film check valve to the sheets of the bag are NOT made through the coupling points, as is claimed.

The inventive concept set forth in claim 21 is that the coupling points 34 are both spaced from the seals 31,35 which define the bladder AND couple both the upper and lower films 25,26 together as well as couple the films to the upper sheet 21. This concept is not disclosed in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
